

# Virtual Reality (VR): Generating impact on skills development

Immersive learning platforms, implementing new methodologies such as Virtual Reality, are a reality and are part of the proposed solutions for the development of skills (power skills).

From Re-evolucion we propose meaningful and impactful learning experiences where the participant is the protagonist in first person.

For this purpose, we have implemented an immersive platform (VR) with different scenarios that allow us to reproduce and train day-to-day situations.

Experiences in which to develop empathy and emotional intelligence, identify biases, public talking, train and develop leadership and communication skills, team work, make presentations, meetings, ... because immersive environments recreate situations and emotions, boosting commitment, attention and learning retention.

According to neuroeducation experts **"to learn you have to be excited"** and Virtual Reality (VR) has the ability to generate emotional experiences in 360° scenarios.  
**Emotion and surprise, two key words to remember and fix learning.**

Endless possibilities to engage participants and enhance their development.

## BENEFITS OF VIRTUAL REALITY AS A LEARNING TOOL

**Expand the LEARNING POSSIBILITIES**  
Interactive and immersive environment

**Increase MOTIVATION and ENGAGEMENT**  
Captures the interest and encourages the active involvement of the participant in their learning

**MEANINGFUL and IMPACTFUL learning experiences**  
Skills are trained in an environment that accurately and reliably simulates real-life situations

**Increase learning RETENTION**  
Skills are developed in less time and with greater impact and engagement than with other methodologies

**Facilitating RESOURCES in COLLABORATIVE environments**  
Virtual whiteboard, sharing presentations, videos,... session recording and data capture

**Increase ATTENTION and ENGAGEMENT**  
Generates greater involvement and better feedback from participants. Deepens in individual areas of development (data analysis: heart rate,...)

**ACCESSIBILITY**  
Quickly and easily enables the use of the Platform on any device with or without virtual reality glasses

**Increase EMPLOYEE EXPERIENCE**  
Promotes a culture of continuous improvement in the organization and connects participants with the brand

We offer **new and innovative development and training solutions** through immersive and collaborative methodologies, both **face-to-face and online.**

**Re-imagine new ways of learning**
